

August 30, 2017

We have all seen the devastation caused by Hurricane Harvey and the unspeakable consequences for many in the Houston area. Hurricane Harvey has dumped more than 40 inches of rain across Texas over the past 5 days. The National Weather Service has called the flooding an “unparalleled epic catastrophe”. We are receiving devastating updates daily from our employees that many homes, possessions, and cars have been totally lost. Our hearts and prayers go out to all of our affected employees and we wish continued safety for themselves and their families.

Both BWAY and Mauser have long histories of working together and for taking action when we see the need or opportunity. In this spirit, we would like to offer you the opportunity to assist your colleagues in the greater-Houston area where we have more than 200 employees, many of whom have lost their homes and belongings. We have established a BWAY/Mauser Flood Relief GoFundMe page to collect monetary donations needed to purchase essential items which will be transported into the stricken areas for the benefit of all impacted BWAY/Mauser employees. Volunteers from our Mauser Pine Bluff and Anniston facilities will begin to deliver these supplies as soon as routes into the area are open and safe.

In order to support this humanitarian program, donations will be gratefully accepted using the following link [Mauser Cares](#). SCI/BWAY/Mauser will match every dollar contributed through these efforts and 100% of the total will be used to supply goods and necessary support to our employees and their families over the coming days, weeks, and months. In addition, for each donation of \$50 or more, we will also send you a t-shirt commemorating our effort to help during this very trying time.

Please support our efforts to help our BWAY/Mauser colleagues who have suffered catastrophic losses at the hands of this unprecedented storm and help them get back on their feet as quickly as possible.

Thank you in advance for your generosity of spirit and contributions.
